Student Winners of the Minerva-CIAC Responsible Care Case Study Competition From Universities in Quebec and Ontario

Minerva Canada and its industry partner, the Chemistry Industry Association of Canada (CIAC), are proud to announce the winners of the 2016 Minerva-CIAC Responsible Care case study competition open to all undergraduate engineering students in Canada. The three finalists made their presentations during the October 2016 Chemical Engineering Conference held in Quebec City and coordinated by the Chemical Institute of Canada. Minerva Canada is grateful for all the assistance provided by Glencore and the case study writing group at the University of Waterloo in developing the case study for this competition.

The case study was focused on the mining industry and students were asked to resolve issues in the cyanide solution mixing process used to extract base metals in the ore. Anthony Pasteris, President, Minerva Canada and Luc Robitaille, CIAC, Vice President, Responsible Care presented the awards, during the student awards banquet for the Conference. The following are the winning students:

In first place from l'Ecole Polytechnique with a prize of \$500: M. Gagnon-Dorval, O. Gazil, D. Leroux, J. Tremblay-Martel.

In second place from the University of Toronto with a prize of \$300: K. Dritsas, K. Wei, K. Musalem, A. Kostruba.

In third place from the University of Waterloo with a prize of \$200: T. Donnelly, D. Tu, A. Vasile, W. Klanac

About Minerva Canada Safety Management Education Inc.:

Minerva Canada, a non-profit volunteer-run organization, aims to be a global leader in health and safety management education by influencing the curriculum of post-secondary institutions to ensure that future business leaders create healthier and safer workplaces. The only organization of its kind, it advocates for increased inclusion of health and safety concepts in curricula; educates the educators by providing business and engineering professors and instructors in universities and colleges with practical, curriculum-ready tools and initiatives; forges partnerships with governments, associations and accreditation boards; and connects educators with Canada's business enterprises to learn what industry seeks from new graduates entering the workforce and how health and safety management concepts are being applied in the workplace.

All resources and activities are provided free of charge to educators, financially supported by our roster of blue chip corporate, organizational and government sponsors. Key sponsors include the Ontario Ministry of Labour, WorkSafeBC, the Ontario Workplace Safety and Prevention Services, Imperial Oil Limited, General Motors of Canada, DuPont Canada, Nova Chemicals, Bruce Power, Shell Canada, Erco Worldwide, Glencore, CF Industries, Nexen, BASF, Chemtrade Logistics, H.L.Blachford, Canada Post, Trimac, the Board of Canadian Registered Safety Professionals, the Canadian Society of Safety Engineering, the Chemistry Industry Association of Canada, Mitacs, Ontario Society of Professional Engineers and Mirarco.
